

How to use
our App

Husky Study App

Intro to Husky Study App

- A collaborative chat app that allows the users to create and join virtual study groups.
- Facilitates shared study sessions and collaboration between users.
- Built using SwiftUI and Firebase – authentication, cloud firestore and storage.

SignUp

The first screen (8:40) shows a 'Back' button and three input fields: 'Email', 'Password', and 'Display name'. Below the fields are 'SignUp' and 'Login' links. The second screen (8:41) shows the same form with the 'Email' field filled with 'testing@gmail.com', the 'Password' field masked with dots, and the 'Display name' field filled with 'Testing'. The 'SignUp' and 'Login' links remain at the bottom.

Login

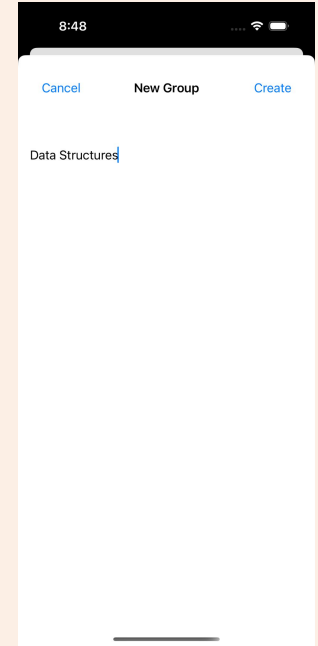

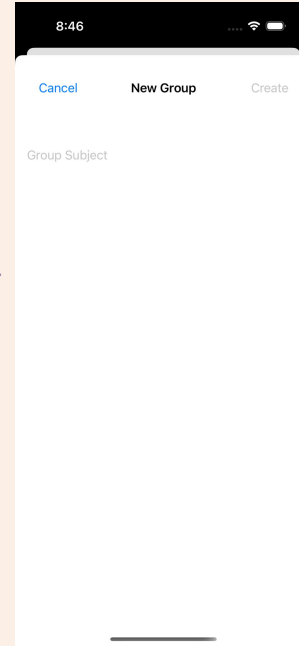

The first screen (8:39) shows a 'Back' button and two input fields: 'Email' and 'Password'. Below the fields are 'Login' and 'SignUp' links. The second screen (8:42) shows the same form with the 'Email' field filled with 'testing@gmail.com' and the 'Password' field masked with dots. The 'Login' and 'SignUp' links remain at the bottom.
